

Scaling up Small Millet Post-harvest and Nutritious Food Products Project

Project profile

Overall objective

To develop and apply ways for scaling up small millet processing and value addition technologies to reduce drudgery of women and improve the nutritional (and diet-related health) security in India

Specific objectives

1. To scale up small millet processing and value addition technologies
2. To test different business development and service provision approaches
3. To inform key policy makers and other important stakeholders on interventions needed for scaling up
4. To build the awareness and capacity of end users
