

# Scaling up Small Millet Post-harvest and Nutritious Food Products Project

# Project conceptual framework

## Scaling up processing technology

1. Processing technology development
  - a. Improving existing technology
  - b. Addressing technology gaps
2. Facilitating adoption of processing technology
  - a. Supporting equipment manufacturers
  - b. Demonstrating in major production regions
  - c. Supporting SMPUs
  - d. Capacity building on processing
  - e. Guidance for new entrants
  - f. Developing a local cadre of mechanics

## Capacity building of end users of food products

1. Preparation of promotion materials
2. Improving awareness through nutrition education campaigns involving media & promotional events
3. Skill building on utilisation through recipe demonstration
4. Increasing availability at affordable price through shortening value chain

## Scaling up small millet food products

1. Strengthening micro, small and medium food enterprises
2. Strengthening pushcart millet porridge vendors
3. Addressing supply chain constraints through supporting FPOs and building linkages among value chain actors
4. Facilitating inclusion of millet in public food programmes

## Informing stakeholders

1. Policy studies
2. Synthesizing & sharing policy lessons
3. Publications
4. Policy workshop
